LETTER OF RECOMMENDATION

I am writing this letter of recommendation in support of Mr. Shivam Thakur's application for a Master's course at your acclaimed university. I have been associated with him for four years in my capacity as his professor for the subject of Production Planning and Control and Operation Research. I have seen the drive and enthusiasm with which he takes up all his tasks and I am confident that he is a deserving candidate for your program.

Shivam actively participated in all the practical and classroom sessions and never hesitated in posing doubts and questions. He was an active participant in class discussions, which helped him refine his understandings of concepts like Scheduling, Control Systems and Forecasting. During topic discussions, he often stirred engaging conversations, which led to holistic learning of the subject. Always very attentive in class, he easily mastered concepts like Resource Planning and Line Balancing. He is a self-motivated student with superior potential, which reflected in his submission of neat, accurate and comprehensive assignments well before the deadline. He often stepped out of his comfort zone and took the initiative to learn concepts by engaging in-group discussions. His ability to see the linkages between theoretical concepts and the practical sessions is another commendable quality.

Furthermore, Shivam has been an active volunteer in many events like Alegria-Fest, 2017 and MAHA-TPO Entrepreneurship Event, 2018 where he displayed his excellent team working skill, being an integral part for bringing in many sponsors and publicizing the event at ground level. To add to his skill set, he attended a workshop on 'Automobile Engines' and 'Composites and Polymers' which have influenced him to take interest in upcoming electric vehicles and base his final year project around the same field of study. I can vouch for his good communication skills that were evident from his final year project presentation. Shivam logically explained his topic 'Recycled Polymers in Construction Industry'. With his amicable personality, he shares a good rapport with everyone. He has displayed commendable management and communication skills throughout his tenure and has proved to be a well-rounded individual.

To conclude, I would like to say that Shivam is a hardworking, resolute and dedicated student. He possesses all the necessary attributes to be successful in a program as demanding as the graduate program at your university. Securing admission at your university will benefit him immensely and will be in concordance with his future career plans. He has my unequivocal support to further her career through a master's program at your esteemed university.

Yours sincerely,

Dr. Dhanraj P. Tambuskar
Prof. Mechanical Engineering, Head of Department
